

PROPERTIES WORKFLOW PRODUCT DETAILS

DESCRIPTION

Automated workflows for advanced on-demand materials properties, e.g.:

- Structural import data and relaxation
- Band structure calculation
- Determination of defect formation energy
- Computation of dielectric constants
- And more.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under Grant Agreement No 814487 (H2020-NMBP-TO-IND-2018).
